WHY TURKMENISTAN?

Turkmenistan is one of the fastest growing economies in the world. **It is one of the countries with the largest energy exports in the world.** With billion-dollar construction and infrastructure projects, it holds an important market position for the entire world.

The Awaza city, established to develop the country's tourism, is receiving investments worth billions of dollars.

With the port built in the Caspian, Turkmenistan has become the logistics hub of Central Asia.

Turkmenistan is a country that offers opportunities in many key sectors such as oil & gas, construction, telecommunications, tourism, healthcare, and food.

The planned Ashgabat City smart city project will bring dynamism to the construction sector.
